Dear Commissioner Henney,

As a concerned consumer/citizen, and a new member of the Center for Science in the Public Interest, I beseech you to save human lives by BANNING the use of medically useful antibiotics in animal feed. Adding antibiotics to feed in order to promote growth can make bacteria resistant to those antibiotics. And can leave physicians with no other way to treat life-threatening bacterial infections in humans. That's why I support the petition filed by CSPI.  
Currently, our family primarily consumes mostly produce, rice, legumes and fish. I view most American's eating habits apathetic, pathetic and devastating!

Sincerely,

David Aaron Harbin & Family
